

CAPABILITY STATEMENT

FABRICATION | MACHINING | MAINTENANCE | REPAIRS
WEAR PARTS | BUCKET & ATTACHMENTS | LINE BORING

WEAR PARTS & INDUSTRY BRANDS

Millbrook Engineering supplies earthmoving wear parts and ground engaging tools alongside our engineering and fabrication services, giving customers a single point of contact for both components and the work required to fit, modify or repair them.

We are proud to be authorised dealers for a range of trusted industry brands, carefully selected for their quality, reliability and performance.

OUR APPROACH

Downtime costs money. We assess the problem, identify a practical solution and use our in-house workshop capabilities to get the job completed efficiently. Whether it's a bucket requiring a rebuild, a worn shaft requiring machining, a hard-to-source replacement component or a custom fabrication project, we provide practical, reliable and fit-for-purpose solutions.

ABOUT US

Millbrook Engineering & Maintenance is a regionally owned and operated business based just east of Ballarat. Established in 2017, we support construction, mining, quarrying, earthmoving and agricultural customers with practical engineering, fabrication, machining, repair and maintenance solutions. Our in-house capabilities allow us to take projects from cutting and fabrication through to machining, welding, repair and finishing, helping customers reduce delays and keep equipment operating.

WORKSHOP CAPABILITIES

CNC Plasma Cutting Table

Custom profiles, brackets, gussets, base plates, wear plates and machine components.

Milling Machines

Slotting, facing, keyways, grooves, drilling/tapping and precision component modification.

Press Brake

Folding and forming plate, channels, guards, covers, trays, brackets and supports.

Hydraulic Press

Bearings and bushes, pins, straightening, heavy-duty repairs and assembly/disassembly.

lathes

Machining shafts, pins, bushes, spacers, threads, worn bearing surfaces and replacement parts.

MIG / TIG / Stick Welding

Structural fabrication, machinery repairs, hardfacing, wear parts and rebuild work.

Line Boring

Restore worn bores, pins and pivot points on buckets, attachments and heavy equipment.

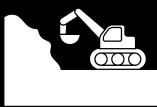

Steel & Structural Fabrication

Custom steel, structural steel, aluminium and stainless fabrication; brackets, frames, guards, supports, trays and machinery components.

INDUSTRIES WE SUPPORT

EARTHMOVING

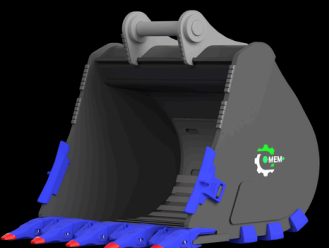

MINING &
QUARRYING

CONSTRUCTION

AGRICULTURE

MEM Attachments is Millbrook Engineering & Maintenance's own range of earthmoving buckets and attachments. Our range includes GP buckets, mud buckets, tilting mud buckets, rippers and other attachments designed to suit a variety of earthmoving applications and machine sizes.

SERVICES & SOLUTIONS

- ✓ Custom fabrication & component manufacture
- ✓ CNC plasma cutting
- ✓ Lathe & milling machining
- ✓ Line boring & bore restoration
- ✓ Bucket repairs & rebuilds
- ✓ MEM Attachments buckets & attachments
- ✓ Earthmoving wear parts
- ✓ Hardfacing & wear protection
- ✓ Machinery repairs & maintenance
- ✓ Workshop & on-site services
